Objective

With more than **32 years of executive leadership** in information technology, digital transformation, and enterprise operations, I have led large-scale infrastructures, global logistics ecosystems, and mission-critical technology integrations—including Amadeus, ERP/SAP, and Sabre—across complex, multi-national environments. My career reflects a consistent ability to **transform organizations**, elevate operational performance, and build resilient systems that sustain growth and competitiveness.

I bring a mature leadership portfolio spanning **risk management, supply chain optimization, governance, business continuity acceleration, and enterprise project management**. Through leading IMCAN's international deployment and refresh programs, I enabled **end-to-end supply chain resilience**, strengthened procurement efficiency, and ensured uninterrupted operational continuity across diverse global stations.

My strategic capabilities include:

- **Risk Management.** Architecting enterprise risk frameworks, embedding mitigation strategies, and elevating organizational resilience.
- **Supply Chain & Logistics.** Strengthening sourcing strategies, optimizing global logistics flows, and enhancing supply chain agility to support business continuity.
- **Governance.** Establishing governance models, compliance structures, and decision-making frameworks that reinforce transparency and institutional integrity.
- **Business Continuity Acceleration.** Designing continuity plans, crisis-response systems, and resilience programs aligned with international standards.
- **Project & PMO Leadership.** Directing enterprise-level programs, leading PMO functions, and driving cross-functional transformation initiatives that deliver measurable impact.

Alongside my executive roles, I am an active **researcher, lecturer, and specialist in artificial intelligence and machine learning**, delivering advanced frameworks that help organizations overcome operational challenges and accelerate digital readiness. My work supports national and international initiatives in technology, leadership, and innovation—guided by a results-driven mindset, analytical depth, and an honorary doctorate in sustainable development.

I continue to lead with a vision centered on **strategic transformation, operational excellence, and future-ready innovation**, contributing to the advancement of organizations and the broader ecosystem in alignment with global best practices and national ambitions.

PROFESSIONAL EXPERIENCES

Project Manager - Business Continuity & Risk Management (MAY 2026 - Present)

Project Manager specializing in Business Continuity and Risk Management, responsible for leading the MAWANI project on behalf of TUV Rheinland and ensuring the successful delivery of all project requirements and outcomes. Operates independently with full accountability for the quality, accuracy, and professionalism of all work performed. Prepares periodic reports, manages stakeholder coordination, and drives project objectives to completion in alignment with the highest industry and organizational standards.

Freelance Consultant – IT & Business Development | Jeddah (2022 – Present)

Executive consultant specializing in **digital transformation, business continuity acceleration,**

governance, and strategic development. Delivering high-impact advisory services aligned with **Saudi Vision 2030**, including quality-of-life initiatives, organizational excellence, and national digital readiness.

Provide advanced training in **leadership, AI & machine learning, strategic planning, business quality, and supply chain optimization.** Delivered over **30 high-level programs** to government entities, universities, and national institutions.

Saudi Airlines – PMO Project Manager | Jeddah (2019 – 2022)

Led enterprise-level PMO functions, governance frameworks, and risk management systems across mission-critical IT and operational environments.

Directed the **TAHDEETH Program**, transforming in-kingdom infrastructure and enhancing digital capabilities.

Provided expert advisory on IT policies, frameworks, and global systems integration, supporting organizational excellence and operational resilience.

Saudi Airlines – Manager, Outstations Infrastructure & Logistics | Jeddah (2012 – 2019)

Oversaw global IT infrastructure, logistics operations, and 24/7 systems availability across multiple regions.

Led deployment of **TAMKEEN & IMCAN** programs, radio communication systems, and international airport technology solutions.

Ensured governance, asset management, business continuity, and IT quality/security compliance across all operational domains.

Managed global coordination with telecom providers, airport authorities, and government agencies.

Saudi Airlines – Systems Manager, IT Infrastructure (ERP/SAP & Converged Networks) | Jeddah (2011 – 2012)

Managed converged network solutions, ERP/SAP integrations, and international connectivity with SITA, STC, and Mobily.

Led cloud network deployments (Wi-Fi, WiMAX, VSAT), WAN connectivity, and billing governance.

Ensured high user adoption through structured communication, training, and change-management processes.

Saudi Airlines – Converged Network Project Manager | Jeddah (2010)

Directed national and international network integration projects, completing major phases of **TAMKEEN & IMCAN** converged network deployments.

Saudi Airlines – IMCAN Desktop Project Manager | Jeddah (2008 – 2010)

Managed full lifecycle of IMCAN desktop program: standardization, procurement, logistics, installation, and cutover.

Supported major projects including **SAP integration**, **Amadeus reservation system**, and airport check-in network design.

Saudi Airlines – Senior Communication Engineer (A/B/C) | Jeddah (1990 – 2008)

Led automation of Saudi Airlines offices, vendor evaluations, SDLC systems, and mainframe integrations.

Managed major infrastructure projects including **IPGN Phase 1** and King Fahad International Airport automation.

Saudi Telecom – Computer Operations Engineer | Riyadh (1990)

Monitored mainframe operations, billing processes, and FEP/NCB system changes.

Key Strengths Across All Roles

- **Risk Management.** Enterprise risk frameworks, mitigation strategies, operational risk assessment.

- **Supply Chain & Logistics:** Global logistics oversight, sourcing strategies, infrastructure deployment.
- **Governance:** Policies, compliance, quality systems, and organizational control frameworks.
- **Business Continuity Acceleration:** Crisis readiness, resilience planning, workflow continuity.
- **Project Management:** PMO leadership, multi-site deployments, digital transformation programs.
- **Digital Transformation:** ERP/SAP, Amadeus, converged networks, AI/ML training, KPI frameworks.
- **Leadership & Training:** Delivered 200+ programs to government and private sectors.

Training attended & Rewards obtained;

Executive Leadership Summary – International Conferences Participation

Demonstrated strong regional and international leadership through active participation in major conferences across the Middle East, delivering high-impact workshops and chairing strategic sessions focused on Artificial Intelligence, Media Literacy, Diplomacy, Training Innovation, and Digital Transformation. Contributed to shaping professional dialogue aligned with Arab Vision 2030 and advancing future-ready skills in the region.

In addition to thought-leadership contributions, consistently applied **project management principles** in planning, designing, and executing conference workshops and sessions—ensuring clear objectives, structured content delivery, stakeholder coordination, and measurable outcomes. This combination of **leadership and project management excellence** strengthened the impact of each event and positioned me as a key contributor to regional transformation initiatives.
